Art Unit: 1724

The title of the invention is objected to because it is no longer commensurate with the invention being claimed, since only process claims remain in this application. Correction is required.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 8 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention. The limitation that process includes a step of "identifying a living body that ... may be in danger of imminently having dangerously elevated levels of ..." (claim 8, lines 3-4) does not appear to be supported by the disclosure originally filed, and hence constitutes **new matter**.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter Applicant regards as the invention. Claim 5 recites removing "endogenous cannabinoid" with an adsorbent for "endogenous cannabinoid" from a fluid "containing endogenous anandamide or endogenous 2-arachidonoylglycerol;" and it is not clear whether this claim is intended to be limited to the removal of endogenous anandamide or endogenous 2-arachidonoylglycerol from the fluid, or to

Art Unit: 1724

the removal of any endogenous cannabinoid from a fluid which merely contains one of these two recited materials.

Claims 5 and 8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6,475,478. Although the conflicting claims are not identical, they are not patentably distinct from each other because the adsorbent recited in the claims of U.S. Patent No. 6,475,478 inherently contains a substance having the recited solubility parameter, i.e. the "water-insoluble carrier" such as polystyrene (see col. 4, line 54).

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).
